PROJECTS

CareNexus — Healthcare Coordination Platform

A healthcare technology project designed to improve coordination between patients, frontline health workers, and healthcare facilities.

Highlights: Patient health profiles, appointment assistance, referrals, follow-ups, diagnostic coordination, medicine information, and facility discovery.

Technologies: JavaScript, Node.js, REST APIs, SQLite, SerpApi / Google Maps integration.
Role / Status: Project Lead / Developer; SIH-aligned healthcare solution; ongoing development.

MiniVyapar — Business Management Mobile App

A mobile application project focused on everyday workflows for small businesses and local merchants.

Highlights: Product management, billing and invoice screens, barcode scanning, new bill creation, and payment-related workflows.

Technologies: React Native, Expo, TypeScript, Expo Camera.
Role / Status: Mobile App Developer; under development.

WebLead AI — Business Lead Generation & Outreach

A project intended to help freelancers and agencies discover real businesses and organize potential-client outreach.

Highlights: Location/category-based business discovery, lead organization, email and WhatsApp outreach workflows, and manual approval before outreach.

Technologies: React, Vite, Tailwind CSS, Supabase, business discovery APIs, AI API integration.
Role / Status: Project Developer; under development.

ENTREPRENEURSHIP & HACKATHONS

Build With Bharat 2.0 — NIT Delhi
Certificate of Participation confirmed. Participated as a member of team **TerraGuard**; team leader: Guruprasad Godamgave.

Smart India Hackathon (SIH) — Healthcare Problem-Solving
Developing CareNexus around a healthcare coordination problem statement aligned with the SIH software theme. This describes project alignment, not a claim of SIH finalist status or an award.

Hackyard BUILD 2026 — IIT Guwahati
CareNexus selected for the in-person Grand Finale scheduled for **24–25 October 2026**. Attendance is planned; the event has not yet taken place as of 12 October 2026.

E-Cell Eureka — Entrepreneurship
Entrepreneurship competition / initiative. Specific participation status, project entry, and result need confirmation before using this resume for formal applications.

LEADERSHIP & EXPERIENCE

Founder — Nexus Technology
Building a digital solutions agency focused on website development and technology services for businesses. Areas of work include project development, UI implementation, client communication, and exploring AI-powered solutions.

Project Lead / Developer — CareNexus
Coordinating the healthcare platform concept and development across patient, frontline health worker, and hospital workflows.
